

iBAS Services

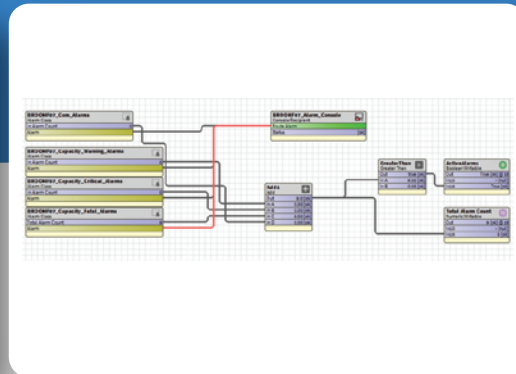

Elevate your BAS experience with the unparalleled capabilities of IBIS software, propelling our services beyond expectations and delivering a truly comprehensive, open and intelligent BAS solution.

We specialize in offering comprehensive services, including BAS Estimation and Take-offs, Controls Drawings, DDC Programming, Front end Graphics, and remote monitoring. Our expertise extends to a diverse array of leading building automation system brands, including Siemens, Honeywell, Distech Controls, Schneider Electric, Johnson Controls, and more.

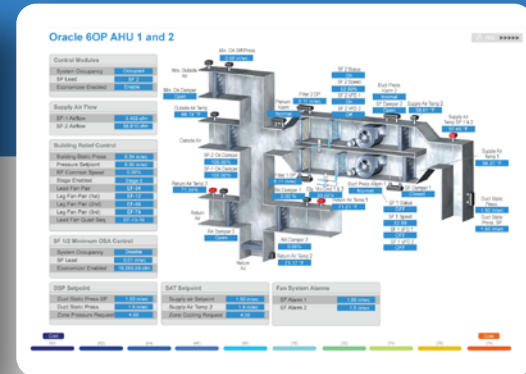

Control Drawings

Controls drawings include detailed HVAC system flow diagram, sequence of operations, network architecture, bill of material and detailed controller wiring.

DDC Program

Easy to understand DDC programing so that techs in the field can commission easily and quickly.

Front-End graphics

We provide standard 3D graphics along with 3D floor plans. We also provide custom 3D graphics depending on customer needs.

About IBIS

For over 25 years, IBIS has excelled in integrated building solutions. Beyond installing and supporting various BAS systems, we empower partners and clients to achieve facility goals—reducing energy costs, increasing occupant comfort, and enhancing operational visibility.

Our standout IBIS Platform offers unique software for clients to see, control, and understand their building systems.

Our team, with 300 collective years of industry experience, includes certified technicians, engineers, integrators, software developers, graphic designers, and project managers—delivering cutting-edge intelligent BAS and Smart Building solutions.

Other Service Offerings

Our technical professionals have the expertise needed to apply leading-edge technology to superior building automation solutions. Our comprehensive portfolio of strategic, tactical and automation services includes:

- Energy Management
- Analytics, AI/ML, and FDD
- Master Systems Integration
- Facility Software Integrations
- Software Development
- Smart Building Consulting
- Space Utilization

Key Benefits

- Enhanced Occupant Comfort
- Unified User Interface
- Open Architectures
- Reduced Operating Costs
- Comprehensive Solutions
- Operational Efficiency
